SUMMARY

Aspiring Full Stack Developer currently pursuing B.Tech in Computer Science & Engineering with specialization in Software Technology. Skilled in developing scalable web applications using Java, Spring Boot, React, and MySQL. Experienced in building responsive frontend interfaces and RESTful backend services through academic and personal projects. Passionate about solving real-world problems through innovative and impactful software solutions.

EDUCATION

2023-2027 B.Tech in Computer Science & Engineering

Centurion University of Technology and Management, Bhubaneswar, Odisha
Specialization in Software Technology, Expected Graduation: 2027

2021-2023 Council of Higher Secondary Education (12th Grade)

Little Hearts Toddlers Academy, Angul, Odisha
Science Stream, Mark: 64%

2019-2021 Board of Secondary Education (10th Grade)

Little Hearts Toddlers Academy, Angul, Odisha
Mark: 81%

TECHNICAL SKILLS

Programming Languages **Java, Python, C**

Frontend Development **HTML5, CSS3, JavaScript, React.js, Angular**

Backend Development **Spring Boot, Node.js, Express.js, Servlets, JSP**

Databases **MySQL, MongoDB**

Tools & Technologies **Git, GitHub, REST APIs, VS Code, Docker**

PROJECTS

Live Project DevCollab – Real-Time Developer Collaboration Platform

Built a real-time collaboration platform to streamline team communication, task management, and project coordination

Implemented WebSocket-based real-time messaging and live updates using Socket.IO

Designed RESTful APIs using Node.js and Express.js for scalable backend services

Developed a responsive frontend using React.js for seamless user experience

Integrated MongoDB for efficient data storage and retrieval

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO

Live Project Expense Tracker – Web Application

Developed a responsive expense tracking web application using React.js to manage daily expenses efficiently

Implemented dynamic state management for real-time addition and deletion of expenses

Designed a clean and user-friendly interface for tracking income and expenses

Deployed the application on Vercel, enabling live access and real-world usability

Tech Stack: React.js, Vercel

PROJECTS (CONTINUED)

Full-Stack **E-Commerce Application**

Developed a full-stack e-commerce web application allowing users to browse products, add items to cart, and place orders
Implemented RESTful APIs using Spring Boot for product and order management
Designed responsive frontend interface using AngularJS
Integrated MySQL database for secure data storage and transaction management
Tech Stack: Spring Boot, AngularJS, REST APIs, MySQL

Machine Learning **Spam Shield AI – Email Spam Detection System**

Developed an AI-based spam detection system that classifies emails as spam or legitimate using machine learning algorithms
Implemented Natural Language Processing (NLP) techniques to preprocess and analyze email text data
Trained a machine learning model using Scikit-learn to improve spam detection accuracy
Built a system capable of automatically filtering unwanted emails, improving inbox security and efficiency
Tech Stack: Python, Machine Learning, Scikit-learn, NLP

Java Web **E-Book Management System**

Built a web-based e-book management platform enabling users to upload, search, and download digital books
Implemented user authentication and session management using Java Servlets and JSP
Used JDBC to connect Java backend with MySQL database
Designed database schema for efficient storage and retrieval of e-books
Tech Stack: Java, Servlets, JSP, JDBC, MySQL
